Projects

FashionWiki(similar to Wikipedia)
- Created a full stack Django Wikipedia Light web application to support multiple Wiki Post Authors with authentication. Users can create, edit, and delete post. Users can also view post made by other users and view related post.
- Designed with Django Templating and CSS. Backend was created utilizing full CRUD operations, allowing users to add, edit, and view multiple post.
- Links: FashionWiki http://app1.jordondouglas.com/

MonstaHouse
- Created a full stack(ReactJS+Django) massively multiplayer online (MMO) raid game with authentication, game shop feature, and functionality to edit user profile.
- Frontend designed with ReactJS, CSS. Implemented backend using Django REST Framework.
- Link: MonstaHouse http://app2.jordondouglas.com/

CitiTech
- A one stop shop for all events, conferences, and groups related to the Tech Community in Memphis.
- Users will be able to see a curated list of events based on their age, experience level(Newbie, Intermediate, Senior), and the type of tech experience they are seeking(Education, Social, Conference, etc).
- Implemented using Fullstack Django. Designed using Django Templating and backend created using google api, CRUD.
